The mechanical NO thermostat closes when the temperature rises and is used to control filter fans, heat exchangers, cooling devices or to switch signal transmitters when the temperature is exceeded. The use of push-in terminals prevents the supply lines from coming loose.

- Fixed supply lines thanks to push-in terminals •
- Time saving thanks to tool-free connection •
- Large adjustment wheel enables convenient adjustability •
- Optimized air intake •
- Can be used at altitudes of up to 5000 meters •
