Code:

Q96P3L ? 96x96mm Multifunction network analyser for LV / MV
Multifunction network analyser suitable for use in three-phase three or four wires systems with unbalanced load for LV / MV even in the presence of distorted waveforms.

Q96P3H ? 96x96mm Multifunction network analyser for LV /MV + THD
Multifunction analyser for use in three-phase three or four-wires systems with unbalanced load and distorted waveforms for LV / MV

Q96R3H ? Multifunction network analyzer for LV / MV with 3 Rogowski coils
The kit contains a multifunctional analyzer with 3 Rogowski coils, the analyzer input does not require external integrators.

Q96S3L ? 96x96mm Single-phase Multifunction network analyser per LV

Multifunction network analyser for use in single-phase systems for LV.

Q96C3L ? 96x96mm DC Multifunction network analyser
Multifunction analyser for use in DC systems.

The voltage input is directly connected to the line, while the proportional current input is derived from shunts.
