Function description

- 2-way binary input push-button interface KNX TP
- Secure commissioning and communication through support of KNX Data Secure
- Identification of the wire pairs via color coding
- Connectable cable length up to 30 m
- Can be installed in flush-mounted sockets with conventional sensors/switches
- Flexible LED controlling, thanks to increased output current of 3 mA commercially available LEDs and low current LEDs can be controlled
- Inputs can be reconfigured to outputs with parameterizable flashing and pulsing function
- Colour coding of wiring pairs
